**Enginasion celebrates 20 years of  
partnering with The L. S. Starrett® Company**

**“Enginasion is my first call on any engineering consulting or  
development project,” says Jeff Wilkinson, General Manager,  
Advanced Technology Division, The L. S. Starrett Company.**

WEST BOYLSTON, Mass., Dec. 15, 2011—[Enginasion](#) (formerly Industrial Automation Systems) announced today that it is celebrating its 00<sup>th</sup> anniversary of partnering with The L. S. Starrett® Company.

The L.S. Starrett® Company is recognized worldwide for its superior tools. In keeping with that leadership role, Starrett wanted to develop a superior, wireless data-collection product line. However, the product line was not simple to develop, as it required the unique blend of sophisticated software programming with exceptional electrical engineering expertise.

“Enginasion’s engineers have a broad and deep range of capabilities, and their skills are often exactly what we need for our projects. Their proposals are scoped and estimated for cost accurately. Their solutions are elegant and are not excessive in cost or complexity. They have real and practical expertise in hardware, firmware and software development that are perfectly suited to our projects and complementary to our in-house team’s skills. They don’t outsource aspects of a project to another group unless clearing it with me first. I trust their judgment and their commitments to complete a project when they say they will. Enginasion is my **first call** on any engineering consulting or development project, especially firmware development in our end product,” said **Jeff Wilkinson**, General Manager, Advanced Technology Division, The L. S. Starrett® Company.

“The L. S. Starrett Company has been known for Quality, Precision and Innovation since 1880, and we are extremely proud to call them our partner,” added **David Bonneau**, Founder and CEO of Enginasion.

**About Enginasion**

Enginasion™ solves some of the most difficult technical problems involving process control, manufacturing automation, and product development, providing clients with electronic, mechanical and software engineering services from concept to production. For nearly two decades, Enginasion (formerly Industrial Automation Systems) has been an invaluable partner to companies in the Industrial, Medical Technology, Military and Pharmaceutical sectors that need a sophisticated yet affordable engineering resource to help them overcome critical hurdles related to automation, control electronics, embedded software, and/or integrated product development. Since 1995, the Company has been providing key elements of successful R&D projects, manufacturing processes, and new high-tech products at innovative companies in the Northeast U.S.
